

E2 English II End-of-Course

Category 1 – Understanding and Analysis Across Genres

TECHNICAL AND FOREIGN WORDS

etymology: origin (history) of a word; meaning of a technical or academic word can often be determined from Latin, Greek, or other linguistic roots

Example: *circum*(around) + *spect*(look) → circumspect (cautious, careful, discreet, watchful)

affix: word part placed before (prefix) or after (suffix) a base word; changes word's meaning in predictable way

Example: Prefix *im-* means *not* and *perceptible* means *able to be sensed* or *recognizable*, so *imperceptible* means *not recognizable*.

Historical developments introduced foreign words/phrases into English.

Examples: In 1985, Gorbachev's *glasnost* (Russian: "openness") policy increased government transparency; came to imply *freedom of speech*.

In reaction to mass production during 1960s, *avant-garde* (French: "advance guard") was widely used to describe innovative cultural works.

From 18th century, *coup d'état* (French: "strike of state") meant *sudden overthrow of government*; also means a *sudden advantage over a rival*

DETERMINING DENOTATION, CONNOTATION, AND ETYMOLOGY

dictionary entry: shows spelling, pronunciation, part of speech, etymology, and meaning(s); **denotation:** (direct or literal meaning(s)) usually shown before **connotation:** implied meaning(s), association

Example: *hackneyed* *hak-nēd'* adj [Middle English *hakeney*] 1. worn out, let out, 2. trite, banal, or worn-out due to frequent use or repetition

Use **context clues** (nearby words or sentences that provide hints about word's meaning) to determine meaning of an unfamiliar word.

- words such as *because*, *such as*, *also*, *like*, *unlike*, and *however* relationships (e.g., cause and effect, example, comparison, contrast)
- an **analogy** (type of comparison) can be analyzed to infer meaning

Example: These political slogans are as *hackneyed* as a tennis pro blaming his own mistakes on his racket. (Analogical analysis of *hackneyed*: Famous tennis pro blames his rackets after mis-hits. Thus, the slogans are as *worn out* as the rackets.)

• sentence structure can help determine the word's meaning

A **thesaurus** lists synonyms and a **dictionary** gives definitions and examples.

Example: thesaurus entry *hackneyed* – banal, common, worn-out, clichéd

TIME PERIODS, THEMES, AND CULTURES IN LITERATURE

genre: groups texts with common characteristics (e.g., literary fiction, nonfiction, poetry, drama); **theme:** central message or idea

text's underlying message: text's implied meaning; thoughts, actions, or images; may have multiple meanings; similarities and differences expressed in different time periods will have different meanings and differences

viewpoint: author's perspective or attitude regarding a topic

inference: reader's conclusion about something that is not explicitly stated in the text(s), such as: author's viewpoint, theme, purpose, message, etc.

evidence: facts, examples, or quotes that support all inferences

Example: Both Marlow and King Lear's King of France speech and Shakespeare's King Lear, set in 16th century Italy, explore the theme of filial piety (respect for parents/ancestors).
