

Introducing DynaNotes STAAR EOC Booklets

Modified Formatting to Support Mainstreaming and STAAR Readiness

DynaStudy is proud to offer its student-friendly STAAR End-of-Course student review guide content in a new booklet format.

- Each DynaNotes EOC booklet displays one section of the corresponding review guide on each 8.5" x 11" page.
- Extra blank space is available on many pages for additional student-specific reminders provided by the teacher.
- Booklets are manufactured using quality gloss paper and color printing with 3-hole-punch for easy year-round storage in students' binders.
- DynaNotes booklets can help you effectively mainstream high-functioning learning disabled students, such as those who are spatially challenged.
- Booklets are an ideal modified resource for students who are minimally visually impaired.
- DynaNotes guides and/or modified booklets provide effective scaffolding in class and at home to maximize STAAR EOC readiness.

While the number of students who will benefit from DynaNotes booklets may be small, we are pleased to be able to help educators meet their students' special needs. We welcome your feedback and ideas. You can share your DynaNotes implementation stories with other educators by uploading your document in the [Teacher's Workroom](#).

DynaNotes work because ... students work with DynaNotes!
